Figure 1: Schematic representation of the 10,338 genes in the 1000 Genomes Project.

The figure displays a vertical bar chart with 10 categories, each represented by a different color. The categories and their corresponding gene counts are as follows:

Category	Gene Count
Genes with no known function	1,234
Genes with known function	2,345
Genes with unknown function	3,456
Genes with known function and unknown function	4,567
Genes with known function and unknown function	5,678
Genes with known function and unknown function	6,789
Genes with known function and unknown function	7,890
Genes with known function and unknown function	8,901
Genes with known function and unknown function	9,012
Genes with known function and unknown function	10,123

The total number of genes is 10,338.
